SHREYAS JAGTAP

Aspiring Data Scientist

Pune, India | +91-8265000879 | shreyasjagtap262004@gmail.com | LinkedIn | GitHub | Naukri

SUMMARY

MCA (Computer Application) graduate with 6 months of hands-on experience building demand forecasting models and Power BI dashboards on real retail sales data at Hisan Lab Pvt. Ltd. Built and deployed 2 end-to-end machine learning projects (Documented GitHub repos) covering classification and NLP. Comfortable working across the full data science pipeline: SQL extraction, Python-based cleaning/modeling, and business-facing dashboards. Looking for an entry-level Data Scientist / Data Analyst role.

SKILLS

Programming: Python, SQL

Libraries & Frameworks: Pandas, NumPy, Scikit-learn, XGBoost, TensorFlow, Matplotlib, Seaborn, NLTK, spaCy, OpenCV

Machine Learning: Regression, Classification, Clustering, Feature Engineering, Model Evaluation, Hyperparameter Tuning

Deep Learning: Artificial Neural Networks (ANN), CNN, RNN, GRU, Encoder Decoder, Cosine Similarity

Natural Language Processing: Text Preprocessing, Tokenization, Word Embeddings, Named Entity Recognition, Sentiment Analysis

Data Visualization & BI: Power BI, DAX, Power BI Service, Tableau, Excel,

Databases & Tools: MySQL, PostgreSQL, Fast API, Docker, Git, GitHub, Jupyter Notebook, VS Code, CICD

Core Concepts: Statistics Analysis, EDA, Data Cleaning, Data Visualization, Feature Engineering, Data Modeling, Data Labeling

INTERNSHIP EXPERIENCE

Data Science Intern | Hisan Lab Pvt. Ltd. **Dec 2025 – Jun 2026**

- Analyzed retail sales data (50,000+ transactions across 20+ product categories) using SQL and Python to identify seasonal demand trends and slow-moving inventory.
- Built a demand forecasting model (Linear Regression + Logistic Regression) that improved forecast accuracy by ~15% compared to the team's existing manual estimates.
- Automated the weekly sales-reporting workflow using Python (Pandas), cutting manual reporting effort from ~6 hours to under 1 hour per week.
- Designed a Power BI dashboard tracking revenue, stock levels, and top/bottom-performing SKUs across 10+ store locations, used by the team for weekly review meetings.
- Flagged inventory mismatches through data validation checks, contributing to a reduction in stockout instances during the internship period.

PROJECTS

Shopper's Intent Prediction MLOps | Python, Scikit-learn, XGBoost, Fast API, ML Flow, Render

- Developed an end-to-end **Shopper's Intent Prediction** machine learning pipeline using **Python, Scikit-learn, Pandas, and NumPy** to predict customer purchase intent from online shopping behavior.
- Achieved 92.23**% Accuracy**, 97.78% **ROC-AUC**, and strong Precision, Recall, and F1-Score through model evaluation and optimization.
- Built a production-ready FastAPI REST API, containerized the application with Docker, integrated MySQL for data storage, and implemented MLOps practices using Git/GitHub.

Movie Recommendation System (NLP) | Python, NLTK, Scikit-learn,Imdb API

- Built a content-based Movie Recommendation System using NLP and Cosine Similarity to recommend movies with similar content based on user-selected titles.
- Processed and transformed TMDB movie metadata by extracting genres, cast, crew, keywords, and overview, then applied text vectorization using TFIDF for new tags column.

  Implemented the recommendation engine with Scikit-learn and optimized similarity search for fast, accurate recommendations using precomputed similarity matrices.

EDUCATION

- **Master of Computer Applications (MCA) Pune Cambridge Institute, Pune** **2024--**2026
- **Bachelor of Business Administration in Computer Applications (BBA-CA) Sarhad College, Pune** **2021--2024**

CERTIFICATIONS

- Deloitte Data Analytics Professional Certificate
- Python for Data Analytics from Basic to Advance Bootcamp - Udemy
